

Opening a Word Processing Document

Note: When I hold the Braille Plus it is in a vertical position with the ear piece (I call it the microphone) at the top. The Apps key can be located directly below the ear piece.

➔ Press the App button

➔ Now the Braille Plus responds by saying Applications Menu.

➔ Press the down arrow key to navigate until you hear: 5 Tools Menu.

Note: Press the number 5 to get to the Tools menu instead of pressing the down arrow key 5x.

➔ Applications Menu

1. Workspace
2. Music Player
3. Library Menu
4. Internet Menu
5. Tools Menu

➔ Once you hear it say Tools Menu Press OK 

➔ It then repeats 1 word processor

➔ Now Press OK 

➔ It then repeats untitled

The Braille Plus will always open a new document called untitled unless you were in the word processor previously and did not exit the application. Also it will not automatically save the document you are working in. You must save it yourself.

Super Short Cut

- ✓ Press Apps
- ✓ 5 1
- ✓ OK
